

JURA Pocket Pilot 2.0

The new generation in mobile payment and management

JURA Pocket Pilot 2.0 raises the bar for payment, accounting and the management of professional automatic speciality coffee machines. This free software enables cashless payment and requires no additional equipment such as coin checkers or card readers, or even a downloadable app. With Pocket Pilot 2.0, you can also monitor and manage all connected coffee machines and customise the system to suit your needs. In short, Pocket Pilot 2.0 is probably the easiest, most flexible and most cost-effective accounting and management system for JURA automatic coffee machines.

Technical Data

iOS	14.3 or higher
Android	Min V9.0 or higher
Chrome Browser	Version 105 or higher
Samsung Browser	Version 20 or higher
Bluetooth Version	Version 4.0 or higher
Internet connection	Required

Simple – no external hardware required

Pocket Pilot 2.0 allows both cashless payment and central machine monitoring without any additional infrastructure. It uses Payment Connect, which links the coffee machine with a mobile device. This is easy to install in the coffee machine. Pocket Pilot 2.0 is free, web-based and requires no software installation. Once you have created a JURA Pocket Pilot account, you have access to a comprehensive, user-friendly management system.

Cashless mobile payment

Nowadays, many people prefer the convenience of contactless payment using a smartphone. When you scan the QR code on the machine's display, Pocket Pilot 2.0 opens and connects to the device. Now you can select your beverage and pay in the payment window using your preferred payment method. Once the transaction is complete, your chosen speciality is prepared automatically. It's that simple: scan, pay, enjoy. Pocket Pilot 2.0 supports Stripe, Alipay, Worldline and GlobalPay payment systems.

Central monitoring and management

With Pocket Pilot 2.0, you can keep track of all your JURA coffee machines in one place and manage them conveniently and remotely. The dashboard can be fully customised to your requirements. There are five different modes to cover all business models. Pocket Pilot 2.0 displays a range of useful statistics, monitors revenue and provides user management functions. You also have the option of changing the price per cup, the available specialities and their recipes – all from a central point.

Compatible automatic coffee machines

- GIGA X8c/X8 (EB)
- GIGA X3 (EB)
- GIGA W10 (EA)
